

Bukti Corresponding Author (CA) atas nama Firdawsyi Nuzula publikasi pada Jurnal Health Notions terakreditasi Sinta 4 dengan judul “The Effect of Health Education on the Level of Knowledge About Anemia in Adolescent”

The screenshot displays the 'Active Submissions' page of the Health Notions journal. The page header includes the journal title 'Health Notions' with its logo and ISSN 2580-4936, published by the Humanistic Network for Science and Technology. A navigation menu is located at the top, and a breadcrumb trail shows the user's path: Home > User > Author > Active Submissions.

The main content area is titled 'ACTIVE SUBMISSIONS' and features two tabs: 'ACTIVE' (selected) and 'ARCHIVE'. Below the tabs, a table lists active submissions, but it currently shows 'No Submissions'. A 'START A NEW SUBMISSION' section provides a link to begin the process. A 'REFBACKS' section shows a list of one item with columns for date added, hits, URL, article title, status, and action.

The right sidebar contains a 'Visit STATISTICS' chart, a 'USER' section indicating the user is logged in as 'nuzulafirdawsyi13' with links to 'My Journals', 'My Profile', and 'Log Out'. Below this is an 'INFORMATION' section with links for 'For Readers', 'For Authors', and 'For Librarians'. The 'JOURNAL CONTENT' section includes a search bar, a search scope dropdown set to 'All', and a search button. At the bottom of the sidebar, there is a 'Browse' section with links for 'By Issue', 'By Author', 'By Title', and 'Other Journals'.

At the bottom of the page, there is a footer with the journal's ISSN, contact information for the Humanistic Network for Science and Technology (Cemara street 25, 0017002, Dare, Dk./Kec. Sukorejo, Ponorogo, East Java, Indonesia, 63453), and a phone/WhatsApp number. A world map graphic shows '35 Today Pageviews'.

education to young women aims to overcome the high problem of anemia and is one solution to increase knowledge about anemia. This study aims to identify the effect of health education on the level of knowledge about anemia in adolescent girls at SMK Negeri 17 Agustus 1945 Genteng. This study used a Quasi Experimental control group pre-test post-test method using the experimental group and the control group. The population of this study was 225 students with a sample of 100 students who were selected using purposive sampling technique. The instrument used is a questionnaire about knowledge of anemia and health education with leaflets and video power point media. The analysis technique used is the Paired Samples Test. The results of the analysis show the value of $\alpha = <0.05$, the Sig value is obtained. (2-Tailed) = 0.000, it means that there is an effect of health education on the level of knowledge about anemia in adolescent girls. It is hoped that after health education about anemia in adolescent girls can prevent anemia, especially during menstruation.
