Title and Abstract

Title: Kesadaran dan Sikap Santri dalam Penerapan Protokol Kesehatan Covid-19

Abstract

The Covid-19 pandemic is a health problem that has received special attention from the government. The pesantren environment is one of the areas of concern in the spread of the Covid-19 virus because daily activities are carried out in groups. Breaking the chain of transmission of Covid-19 can be prevented with high awareness and a positive attitude in implementing health protocols. So research is needed that aims to analyze the relationship between awareness and attitudes of students with the implementation of the Covid-19 health protocol at the Manbaul Ulum Berasari Muncar Islamic Boarding School, Banyuwangi. This study used a cross-sectional design involving 130 respondents selected by simple random sampling technique, in May 2022. Data was collected by filling out a questionnaire. The results of the analysis show a p value of 0.000, both for awareness and attitude factors. It was concluded that awareness and attitude are related to the implementation of health protocols by the students.

Keywords: Covid-19; health protocol; attitude; awareness

ABSTRAK

Pandemi Covid-19 menjadi masalah kesehatan yang mendapat perhatian khusus oleh pemerintah. Lingkungan pesantren menjadi salah satu area dalam penyebaran virus Covid-19 karena aktivitas setiap hari dilakukan secara berkelompok. Pemutusan rantai penularan Covid-19 dapat dicegah dengan kesadaran yang tinggi dan sikap yang positif dalam penerapan protokol kesehatan. Maka diperlukan penelitian yang bertujuan untuk menganalisis hubungan antara kesadaran dan sikap santri dengan penerapan protokol kesehatan Covid-19 di Pondok Pesantren Manbaul Ulum Berasari Muncar Banyuwangi. Penelitian ini menggunakan rancangan *cross-sectional* yang melibatkan 130 responden yang dipilih dengan teknik *simple random sampling*, pada bulan Mei 2022. Data dikumpulkan melalui pengisian kuisioner, lalu dianalisis dengan uji *Chi-square*. Hasil analisis menunjukkan nilai *p* 0,000, baik untuk faktor kesadaran maupun sikap. Disimpulkan bahwa kesadaran dan sikap berhubungan dengan penerapan protokol kesehatan oleh para santri.

Kata kunci: Covid-19; protokol kesehatan; sikap; kesadaran
